# Free Mounting Pattern

An accurate, computer-generated pattern printed on resilient, weather-resistant material. Precise hole locations are printed directly on the pattern from a vector art file. Identical characters on an order will have the exact same stud locations for interchangeability and the original art file will be saved for any replacement letters needed in the future.

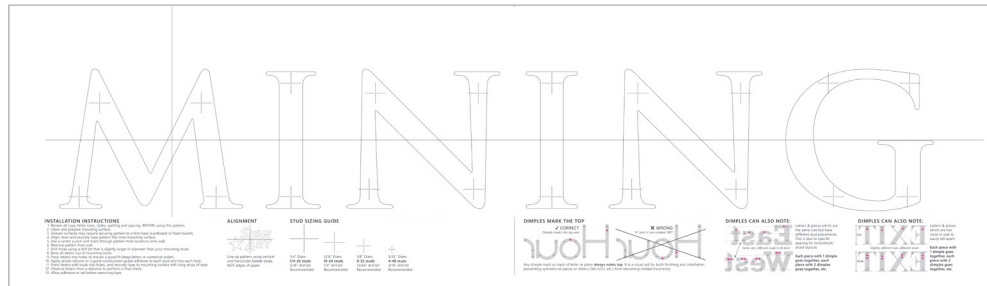

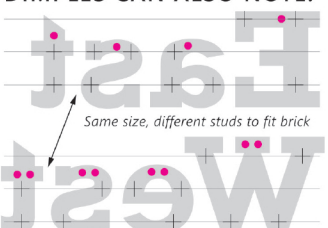

Features and Benefits:

+ Printed on durable, weather-resistant material
  + No tearing
  + No smearing
+ Improved visuals on product and pattern to assist in ease of installation
  + Precise hole locations marked, along with recommended drill bit size
  + Dimples on product to identify orientation and/or grouping
+ Ability to pre-order pattern ahead of time, if helpful
  + Allows for pre-work on-site if beneficial for a larger scope installation
+ Tiered pricing for ease of quoting and predictability of project costs
+ Ability to produce and install replacement letters, with no extra drilling

As always, our goal is to provide tools and services to make your sign projects successful.

STUD SIZING GUIDE

1/4" Diam.	3/16" Diam.	1/8" Diam.	3/32" Diam.
1/4-20 studs	**10-24 studs**	**6-32 studs**	**4-40 studs**
5/16" drill bit Recommended	1/4" drill bit Recommended	13/64" drill bit Recommended	3/16" drill bit Recommended

DIMPLES CAN ALSO NOTE:

Letters & pieces which are the same size but have different stud placements. This is due to specific spacing for brick/block/arced layouts.

Same size, different studs to fit brick

Each piece with 1 dimple goes together, each piece with 2 dimples goes together, etc.

Dimples serve two purposes:

+ Identify the orientation of the piece, by identifying the top if it's a symmetrical letter or part of a logo
+ Multiple dimples indicate what line of text they belong to.
  + •, ••, •••, etc...
